**Thank you for choosing Next Health Group.**

**Over the past ten years, we have grown to become WA's largest provider of independent medical assessments. As such our medical specialists have conducted thousands of general and permanent impairment assessments. Their unprecedented experience across a wide range of disciplinary fields means you can expect dependable medical expertise and opinion, whatever your needs.**

## **Why Next Health Group?**

### **Expertise**

While we do pride ourselves on the range of services we offer, our people are actually our most valued asset.

The majority of our consultants are Approved Medical Specialists, qualified to provide permanent impairment and permanent disability assessments. But we also have specific consultants who specialise in medical negligence. So you'll always be in good hands with us.

## Our Services

The list below demonstrates the breadth and depth of our experience and expertise. If you require something not noted here please contact us.

- Independent medical assessments for workers compensation injuries, motor vehicle and personal injuries
- Second opinion (surgery or treatment)
- Permanent impairment assessments, including opinions on permanent impairment assessments done by others
- Out of hours permanent impairment assessments
- Treatment plan reviews and file reviews
- Bill reviews
- Medical negligence (specific consultants only)
- Regular specialists visits
- In house bespoke education
- Assessment via video conferencing
- Multi-disciplinary assessments
- Psychiatric assessments (in person or via video conferencing)
- Fitness for duty

Next Health Group uses the AMA 5th Edition and the WorkCover WA Guides for the evaluation of permanent impairment.

### Statewide and beyond

For your convenience, we have specialists based in Perth, Albany, Busselton, Bunbury, Geraldton, Karratha, Kalgoorlie, Port Hedland and Darwin.

But if you ever need help on the spot, you can always access a specialist through our **Live Chat member service**, or telephone. Of course for less pressing matters, email is also an option.

### Committed to education

We also understand that sometimes it's important that your staff be prepared to manage certain scenarios themselves. Which is why we provide in-house specialist medical expertise on relevant topics, such as;

- Permanent impairment training
- Expert selection and the best way to get value for money
- Pain management
- Physical injury treatment and trends
- Psychiatric illnesses and treatment

### On-site advice

We know that sometimes the process of claim management could be simpler. So we make our specialists available to you for on-site visits at your workplace. They'll be there to help manage claims as efficiently and effectively as possible.

### Helping you manage referrals

We are always happy to provide you with regular statistics based on your referral patterns and our performance. These statistics will offer insight into;

- The time it takes for your claimant to see a doctor
- The time it takes to issue a report
- The number of referrals we have had from you in a specific time frame

### Di-identified reports

At any time, if you are unfamiliar with a particular specialist and would like to try someone new, we are happy to provide de-identified sample reports.

You can request de-identified reports by phone or by email.

## Making an appointment

Bookings, rescheduling or cancellations can be done online or by phone. Appointments are always confirmed with the referrer beforehand via email and with the claimant via mail and SMS.

## Meet our team

With a diverse team of consultants, we have the specialties and experience to suit any kind of claim. You can view their profiles at **nexthealth.com.au** or if you would prefer to meet in person, we would be happy to arrange an introduction with you and a specific doctor, group of specialists or our admin staff.

Please let us know if you would like us to arrange a meeting for you.

## Experience the assessment process

We welcome clients to visit our rooms to experience the typical assessment process, from checking in and having an assessment, to the delivery of the end result.

Contact us to arrange a time to come in.
